

GenEspecia

GenEspecia
A New Asia Corporation

GenEspecia is your only New Asia-sanctioned human transgenesis provider.

Welcome to **TranSpa** from GenEspecia.

Throughout history, humankind has marveled at the ingenious programming of the human DNA, but only a small fraction of your genetic material is directly responsible for who you are. Then GenEspecia scientists discovered how to tap into that vast remaining resource within you.

GenEspecia thoroughly analyzes your entire genome and our exclusive **QuantaCom (QC)** then creates new blueprints and instructions to modify your body. QC chooses the necessary genetic materials (**Gmat**) and **GenSwitch (GSx)** sequences to create your desired traits. Depending on the modifications chosen, body transformations can be realized in only 45 to 120 days, on average. Nearly 100 traits from GenEspecia's 780 trait library can be transitioned or changed through reverse **GSx**.

Discomfort free.
At GenEspecia's **TranSpa** you spend your transformation stage in a beautiful twilight while a stem cell suspension accelerates regeneration. New limbs, fur, or cranial reshaping all occur while your body floats serenely. You awake to be a new being—a new species.

A GenEspecia counselor can work with you to develop a comprehensive road map to a wide variety of traits from a library of species that will allow you to express your inner animal.

Some genetic modifications may pass traits to offspring. Please talk to your GenEspecia counselor. For a full list of possible side effects visit GenEspecia.com.
