HEADJACKING

CAPITAL OFFENSE :: SUMMARY

THE UNAUTHORIZED RECORDING AND/OR REMOVAL OF MEMORIES OR EXPERIENCES FROM A HUMAN. INCIDENTS HAVE BEEN LARGELY ATTRIBUTED TO DOWNTOWN GANGS (E.G. SHÉ AND HUÒ GŌU) KNOWN FOR USING HEADJACKING TECHNOLOGY. GANGS TYPICALLY ENGAGE TEAMS OF SYNTHS THAT HAVE BEEN TWISTED TO RAPE AND/OR TORTURE THEIR VICTIMS WHILE RECORDING EVERYTHING FROM THE VICTIM'S EXPERIENCE USING ILLEGAL JACKS [SEE SWIGS]. THE EXPERIENCE IS THEN SOLD ON THE BLACK MARKET. [REF. CASE NUMBER 120-DF72] ILLEGAL JACKS DEFECTIVE. IN CONJUNCTION WITH TRAUMA, SURVIVING VICTIMS, DEFECTIVE JACKS MAY RESULT IN PARTIAL OR TOTAL MEMORY ERASURE, AND IN SOME CASES, DEATH. HEADJACKING IS A CAPITAL OFFENSE. [SEE DEFECTS]

SWIG

SENTIENCE WITHDRAWAL/INSERTION GRAVITEUR

DEVICE USED FOR AUTHORIZED ERASURE OF SELECTED MEMORIES AND/OR TRANSFER TO ANOTHER RECIPIENT/SYNTHETIC. SWIGGING [SL] FIRST APPEARED IN 2157 AND IS STILL CONSIDERED A NEW DIVERSION. IN THEORY, EXPERIENCES AND MEMORIES, COMPLETE WITH THEIR ACCOMPANYING SENSORY DATA, ARE RECORDED - IN PROGRESS - AND EXTRACTED DIRECTLY VIA THE BRAIN PORT TO THE SWIG. THESE MAY BE TRANSFERRED TO ANOTHER RECIPIENT IN THE SAME MANNER. USERS CLAIM THAT THE "RUSH" OF RELIVING ANOTHER'S EXPERIENCE IS SUPERIOR TO VIRTUAL SIMULATIONS. SWIGS, UNDER PROPER SUPERVISION, HAVE BEEN USED TO SAFELY REMOVE OR TRANSFER SELECTED MEMORIES. (SEE ALSO, DANGERS).

DANGERS

POTENTIAL DANGERS :: SUMMARY

THE N.A. GOVERNMENT CONSIDERS EVEN LEGAL SWIGS TO BE A POTENTIAL DANGER IF MISUSED, AND HAS LIMITED ACCESS PENDING FURTHER RESEARCH. LEGAL SWIGS CAN ONLY BE OBTAINED THROUGH A PHYSICIAN OR ESS. THIS HAS LED TO A PROLIFERATION OF MAKESHIFT DEVICES. UNLICENSED SWIGS ARE DEEMED TO BE 'JACKS', ILLEGAL AND POTENTIALLY LETHAL. [SEE DEFECTS, JACKS, HOLOFILE-Z4768]

DEFECTS

DOCUMENTED DEFECTS [JACKS]:

- POOR MODULATION
- INSECURE MOUNTING/ANCHORING
- FAULTY WITHDRAWAL ALGORITHMS

DEFECTIVE JACKS CAN DAMAGE WHITE MATTER IN THE ADJACENT MEDULLA OBLONGATA OR PONS WITH ADVERSE AFFECTS TO FUNCTIONS SUCH AS RESPIRATION AND HEARTBEAT. A DEFECTIVE SWIG, OR JACK, CAN CAUSE IRREVERSIBLE INJURY OR DEATH. [SEE BRAINPORT: HOLOFILE-Y7F44]

BRAINPORT

SUMMARY

THE PORT IS INSERTED BEHIND THE RIGHT EAR JUST BELOW THE OCCIPITAL BONE AND LATERALLY JUST ABOVE THE C1 VERTEBRA AND IS VISIBLE AS A SMALL PATCH ~20 MM SQUARE WHEN TOUCHED BY THE OWNER. A 5 MM SLOT IN THE CENTER CONNECTS TO THE BASE OF THE PONS, INTEGRAL TO THE BRAINSTEM, CONNECTING THE MEDULLA AND THALAMUS. THE PONS IS CONSIDERED WHITE MATTER AND IS USED TO CONDUCT SIGNALS FROM THE FOREBRAIN AND MIDBRAIN. IT HELPS A NUMBER OF AUTONOMIC FUNCTIONS LIKE SLEEP, RESPIRATION, SWALLOWING, BLADDER CONTROL, HEARING, TASTE, EQUILIBRIUM AND DREAMING. [SEE ALSO CHIPSET, IMPLANTATION]

CHIPSET

BACKGROUND : IMPLANTATION : CHILDHOOD

THE INITIAL IMPLANTATION PROCESS SEEDS NANO-ASSEMBLERS DESIGNED TO LOCATE THE PONS, AND PINPOINT CRITICAL PLACEMENT OF THE BASE GRID AND RECEPTORS. [SEE BRAINPORT]. ADDITIONAL PROGRAM NODES ARE ASSEMBLED TO INTERFACE WITH LUMINOUS IMPLANTS ALLOWING INDIVIDUALIZED PHYSIOLOGIC CONTROL, TELEPATHIC VISUAL / AUDIO COMMS RECEPTION AND TRANSMISSION. MIDBRAIN PATHWAYS VIA THE PONS ALSO PROVIDE ACCESS TO THE HIPPOCAMPUS MEMORY HUB. [SEE HOLOFILE-TZ05H18]
